1 About the Faculties

The B.A. & Sc. is an interdisciplinary degree intended for students who want to pursue simultaneously a program offered by Arts and one offered by Science. The B.A. & Sc. is intended for students with well-defined interdisciplinary interests, and is not meant as a "compromise" between a B.A. and a B.Sc. degree. If you are more interested in Arts, but would like to study some Science, you can do so within the B.A. degree. Similarly if you are more interested in Science, but would like to study some Arts, you can do so within the B.Sc. degree.

To learn more about the Faculty of Arts, see the eCalendar under [Faculties & Schools > Faculty of Arts > The Faculty > : About the Faculty of Arts](#). To learn more about the Faculty of Science, see the eCalendar under [Faculties & Schools > Faculty of Science > The Faculty > : About the Faculty of Science](#)

2 Programs and Teaching in Arts and in Science

Programs and teaching in Arts are described in the eCalendar under [Faculties & Schools > Faculty of Arts > The Faculty > : Programs and Teaching in Arts](#). Those in Science are described in the eCalendar under [Faculties & Schools > Faculty of Science > The Faculty > : Programs and Teaching in Science](#)

5 Degree Requirements

Each student pursuing a B.A. & Sc. must be aware of the regulations as stated in this section of this publication and on the McGill and Science Office for Undergraduate Student

In particular students should note the following:

-

PHYS 142 (4) Electromagnetism and Optics

At most two of another 5 foundational Science:

COMP 202* (3) Foundations of Programming

ESYS 104 (3) The Earth System

PSYC 100* (3) Introduction to Psychology

* Note: Students in a minor or major concentration where COMP 202 or PSYC 100 is a required course will need to take an alternate COMP or PSYC course if using COMP 202 or PSYC 100 to satisfy the Freshman Program requirement.

ARTS

At least three Arts courses (or 9 credits) to be chosen in one of the following three categories: Humanities, Languages, and Social Sciences.

A maximum of two courses (or 6 credits) may be chosen from one category and no more than two courses (or 6 credits) can be taken in any one department.

Note: No course may fulfill the requirements for more than one program, including the B.A. & Sc. Freshman Program.

Humanities (Literature and Civilization):

Courses selected from the following subjects:

- Art History and Communications Studies (AR and COMS)
- Classics (CLAS)
- East

Courses selected from the following subjects:

- Anthropology (ANTH)
- Economics (ECON)
- History (HIST)
- Linguistics (LING)
- Political Science (POLI)
- Sociology (SOCL)

Advanced Standing/Transfer Credits

Students who have completed the Diploma of Collegial Studies, Advanced Placement exams, Advanced Levels, the International Baccalaureate, the French Baccalaureate, or McGill placement examinations may receive exemption and/or credit for all or part of the Mathematics and foundational science courses as well as exemption from all or part of the Arts courses requirement of the Freshman Program. Similarly, students who have completed courses at other universities or colleges may receive exemptions and/or credits.

Advanced Placement Examination results with a score of 4 or 5 must be declared by the student at the time of registration at the University.

For more information about advanced standing, please consult: <http://www.mcgill.ca/students/transfercredit/>. Students must carefully select their mathematics and science Freshman courses so that they have all the required prerequisites for their intended departmental programs.

5.5 Departmental Programs

If you are pursuing a B.A. & Sc., other than those registered in the Freshman program, you are required to be in an approved program (multi-track, honours, joint honours, interdisciplinary), and to select your courses in each term with a view to timely completion of your degree and program requirements. You must complete one of the program streams described below.

The B.A. & Sc. degree includes a required integrative course (BASC 201, 3 credits), plus electives (10±15 credits).

5.5.1 Multi-Track System

To recognize the diversity of student backgrounds and interests, and the multiple routes to understanding a modern university, the Faculties of Arts and of Science offer a 90-credit multi-track system that includes a major concentration in one faculty, complemented by a major concentration in the other faculty (see below):

Option

- Arts Major Concentration (36 credits) + Science Major Concentration (36±38 credits) (see [Section 9 Overview of Programs Offered](#) for a list of programs open to students in the B.A. & Sc.)
- * Effective September 2013, the multi-track option to complete two minors or two minor concentrations is no longer available. Only one multi-track option remains.

Regulations

- Programs offered by Computer Science, Mathematics and Statistics, and Psychology are considered Science programs for the purpose of the B.A. & Sc.
- All concentrations must be in different academic units. Thus, you may take a Geography program either in Arts or in Science, but not in both.
- Students will include within the 36 credits of their major concentrations university-level (200 or above) prerequisites to required courses within their programs.
- No course may fulfil the requirements for more than one program.

Definitions

- Units: academic departments or administrative equivalents
- Programs: lists of required and complementary courses (including university-level prerequisites for required courses) prepared and maintained by units
- Major Concentration: a program of 36±38 credits taken from a unit's courses

5.5.2 Honours Program

Honours programs demand a high degree of specialization, and require you to satisfy specific departmental Honours requirements while maintaining good Academic Standing. They are designed to prepare you for graduate studies. Students in the B.A. & Sc. who complete an approved honours program must also complete an approved minor concentration or a minor in the Faculties of Arts or of Science. You must complete at least 21 credits in the Faculty of Arts and at least 21 credits in the Faculty of Science as part of your honours program and your minor concentration or minor program. See [section 9.3 Honours Programs](#) for a list of available programs.

To choose the Honours option, you must meet the GPA requirements set out in the [Calendar under University Regulations and Resources > Undergraduate > Graduation > : Graduation Honours: Honours and First-Class Honours for Faculties of Arts and Science \(including B.A. & Sc.\)](#)

5.5.3 Joint Honours Program

If you want to study at the honours level in two disciplines, you can combine a joint honours program component from one discipline with one from a Science discipline; see [section 9.4 Joint Honours Programs](#) for a list of available programs. Each joint honours component consists of a maximum of 36±38 required and complementary credits (not including program prerequisites). In cases where a minimum of 24 credits are in courses normally restricted to Honours students, the total of required and complementary credits may be as low as 30.

To choose the Joint Honours option, you must meet the GPA requirements set out in the [Calendar under University Regulations and Resources > Undergraduate > Graduation > : Graduation Honours: Honours and First-Class Honours for Faculties of Arts and Science \(including B.A. & Sc.\)](#)

5.5.4 Interfaculty Program

An interfaculty program is an approved selection of courses constituting a concentration in an intellectually coherent and unified field of studies. These courses must include approved selections from the Faculties of Arts and of Science and possibly other faculties. See [section 9.5 Interfaculty Programs](#) for a list of approved

5.6.2 Courses Outside the Faculties of Arts and of Science

The following regulations apply to students in the B.A. & Sc. who want to take courses outside the Faculties of Arts and of Science:

- Regardless of your minimum credit requirements for your B.A. & Sc., you are allowed a maximum of 12 credits in ELECTIVE and/or COMPLEMENTARY courses taken in faculties other than the Faculties of Arts and of Science.
- Students in certain designated programs that include a number of REQUIRED and COMPLEMENTARY courses in other faculties are permitted a maximum of 30 credits outside the Faculties of Arts and of Science. These programs are the Interfaculty and Honours programs in Environment, the Minor concentration in Environment, the Interfaculty and Honours programs in Sustainability Science and Society, and the Major concentration in Geography (Urban Systems).
- Any courses taught at McGill University may be used toward the maximum allowed, except for courses taught by the School of Continuing Studies, for which you receive credits only in Continuing Studies. Courses taught by the McGill Learning Centre are excluded from this rule and can count for credit in your degree (see the SOUSA website for a list of approved courses www.mcgill.ca/science/student/continuingstudents/basc/counted).
- F

If you need 97±120 credits to complete your degree requirements, you will normally be registered in a Freshman program until you complete your first year. You must consult an adviser in the Science Office for Graduate Student Advising (SOUSA) to obtain advice and approval of your course selection. For a detailed description of advising and registration procedures, you should refer to the website for newly admitted undergraduate students at www.mcgill.ca/newstudents and to the information on the SOUSA website, www.mcgill.ca/science/student. Advising for all returning students takes place in March for the upcoming academic year. For more information, refer to www.mcgill.ca/basc/students/advising.

6.1 Choosing a B.A. & Sc. Program

The B.A. & Sc. is intended for students with well-defined interdisciplinary interests. There are several options for the main program, all of which specify 75±80 of the 90 credits, leaving only 10±15 credits for electives. Since there are relatively few electives, students entering a program in the B.A. & Sc. should have a clear idea of their objectives, goals, and intended areas of study that they can plan their curriculum carefully.

It should be noted that there is considerable flexibility within the B.A. (Faculty of Arts) and B.Sc. (Faculty of Science) programs. If you are more interested in Arts, but would like to study some Science, you can do so within the B.A. degree. Similarly if you are more interested in Science, but would like to study some Arts, you can do so within the B.Sc. degree. For example, B.Sc. students may complete minor concentrations in Arts and vice versa.

There are four ways to complete programs in the B.A. & Sc. degree:

Multi-Track System

The multi-track system is intended for students who want a program that includes significant components from Arts and from Science.

You complete 36 credits Arts courses, 36±38 credits of Science courses, and a required core course (BASC 201, 3 credits). You can either combine an Arts major concentration with a Science major concentration (36±38 credits each) or you can select a major concentration and two 18-credit minor concentrations* from the other. Additional guidelines for the multi-track system can be found in [Section 5.5 Departmental Programs](#). You will find the program descriptions for the major and minor concentrations in Science, which are unique to the B.A. & Sc. within this section of this publication.

* Effective September 2013 the multi-track option to complete two minors or two minor concentrations will no longer be available. Only one multi-track option will remain.

Descriptions of programs offered in Arts are located in the eCalendar under [Faculties & Schools > Faculty of Arts > Undergraduate](#).

Interfaculty Programs

Interfaculty programs are interdisciplinary in nature. There are currently three such programs: Environment; Cognitive Science; and Sustainability Science and Society. In these programs, you complete 54 credits of the interfaculty program, a minor of 18 credits, and a required core

Joint Honours

To choose the Joint Honours option, you must meet the ~~UCP~~

9.1 Minor Concentrations or Minors

9.1.1 Faculty of Arts

The Arts minor concentrations available to B.A. & Sc. students are listed here. Since the B.A. & Sc. degree requires a certain number of credits in Arts and in the Sciences, there are special requirements for B.A. & Sc. students. Courses counted as Arts minor or minor concentration, the program must include at least 15 credits of Arts courses. Similarly, to be counted as a Science minor or minor concentration, the program must include at least 15 credits of Science courses.

For example, a student completing the 18-credit American Studies Minor Concentration Arts must complete at least 15 of those credits in Arts courses and at most 3 credits in Science courses. As another example, a student completing a 24-credit Science Minor in Interdisciplinary Life Sciences must complete at least 15 credits in Science courses and at most 9 credits in Arts courses.

10.13.2 About Cognitive Science

Cognitive Science is the multidisciplinary study of cognition in humans and machines. The goal is to understand the principles of intelligence and thought with the hope that this will lead to a better understanding of the mind and of learning, and to the development of intelligent devices that constructively extend human abilities.

An Interfaculty Program in Cognitive Science (54 credits) is offered by the following departments:

Computer Science (COMP) (Science)
Linguistics (LING) (Arts)
Philosophy (PHIL) (Arts)
Psychology (PSYC) (Science)

Cognitive Science Committee Members:

Brendan Gillon (Linguistics)
Kristine Onishi (Psychology)
Joelle Pineau (Computer Science)
David Ragsdale (Neuroscience)
Dirk Schlimm (Philosophy)

Please note: New students are required to attend an information session held at the end of August. Please consult the cognitive science website in early August for the date and location.

10.13.3 Bachelor of Arts and Science (B.A. & Sc.) - Honours Cognitive Science (60 credits)

The Honours Cognitive Science, which is restricted to students in the B.A. & Sc., is an extension of the Interfaculty program and offers students an opportunity to undertake a research project in close association with professors in their Arts and Science focus areas. Prior to selecting the Honours program, students should meet with the Interdisciplinary Program Adviser and review the B.A. & Sc. academic requirements for Honours and First Class Honours, which can also be found under "University Regulations and Resources," "Graduation," and "Graduation Honours."

To receive an Honours degree, students are required to achieve a minimum overall program GPA of 3.3 at graduation, and attain a grade of B+ (3.3) or better in COGS 444. Students must complete both the 60-credit Honours program and a departmental concentration or a minor in the faculties of Arts or of Science.

Note: B.A. & Sc. students who take interfaculty programs, including the Honours in Cognitive Science, must take at least 21 credits in Arts and 21 credits

Students must take credits from an extensive list of basic life science courses, 3 credits from an extensive list of health and social science courses, and 3 credits from an empirical and technological science list. The remaining 9 credits may be taken from courses listed in any of the three categories.

Please note: Students studying Anatomy and Cell Biology; Biochemistry; Honours Immunology; Microbiology and Immunology; Neuroscience; Pharmacology; and Physiology are not permitted to complete this Minor

Interested students should contact the Interdisciplinary Program Adviser

Within development studies, the environment has long been recognized as a vital determinant of development. More recently, many scholars have changed their environmental focus to emphasize sustainability. The courses in this stream recognize both: some courses consider how the environment can be exploited to promote human well-being while others consider how the environment must be respected to render development sustainable. Together they highlight the delicate balance that must be attained between humans and environments to maximize possible sustainable livelihoods.

Experience has shown that development requires economic growth and is shaped by the distribution of economic resources. At the same time, the globalized economy has created new opportunities and new challenges for sustained growth. Courses in this stream revolve around the factors contributing to sustained economic growth, the trade-offs associated with different ways of achieving it, and the distributional issues development inevitably raises. More generally this stream is also concerned with understanding what "development" actually entails in different contexts.

10.36 Physics (PHYS)

The Department of Physics, the discipline, and specific courses are described [below](#) under [Faculties & Schools > Faculty of Science > Undergraduate > Academic Programs > : Physics \(PHYS\)](#)

10.36.1 Bachelor of Science (B.Sc.) - Minor Physics (18 credits)

The 18-credit Minor permits no overlap with any other programs. It contains no Mathematics courses, although some of the courses in it have Math pre- or corequisites. It will, therefore, be particularly appropriate to students in Mathematics, but is also available to any Science student with the appropriate mathematical background.

Students in certain programs (e.g., the Major Chemistry) will find that there are courses in the Minor that are already part of their program, and that they may not take for credit because of a substantial overlap of material with a course or courses in their program. After consultation with an advisor, such students may complete the Minor by substituting other physics course(s) from the Major or Honours/Fields programs.

The Major Concentration Physics, which is restricted to students in the B.A. & Sc. or B.Sc./B.Ed., is a planned sequence of courses designed to permit a degree of specialization in this discipline. This program is insufficient to prepare a student for professional or graduate physics; students interested in pursuing a career in physics are advised to take the appropriate B.Sc. program in physics.
